

AMENDMENTS TO THE SPECIFICATION:

Please replace the paragraphs from page 16, line 24 to page 17, line 13 as follows:

Fig. 3 shows the whole logical data structure. The DVD-RW 2 comprises a lead-in area LI at the inner end portion of the disc, data recording zone [[area]] DZ and lead-out area LO.

The data recording zone [[area]] DZ comprises a UDF recording area 27 wherein a micro-Universal Disc Format (UDF) as a logical format representing the relationship between the physical address and the logical address is recorded, and a video data recording zone [[area]] VDZ.

The video data recording zone [[area]] VDZ comprises a video manager recording area 28 wherein a control data having a video manager information (VMGI) is recorded, and a video data recording area 29 wherein video data, audio data, and others are recorded. The control data is called a video manager (VMG).

In the video data recording zone [[area]] VDZ, data are recorded as a plurality of files 30 which are divided into a plurality of sets each of which comprises a plurality of files.
